## Jobsheet-13: Membuat Form Validasi Menggunakan Laravel

## **Mata Kuliah Pemrograman Web Lanjut**

## Oleh:

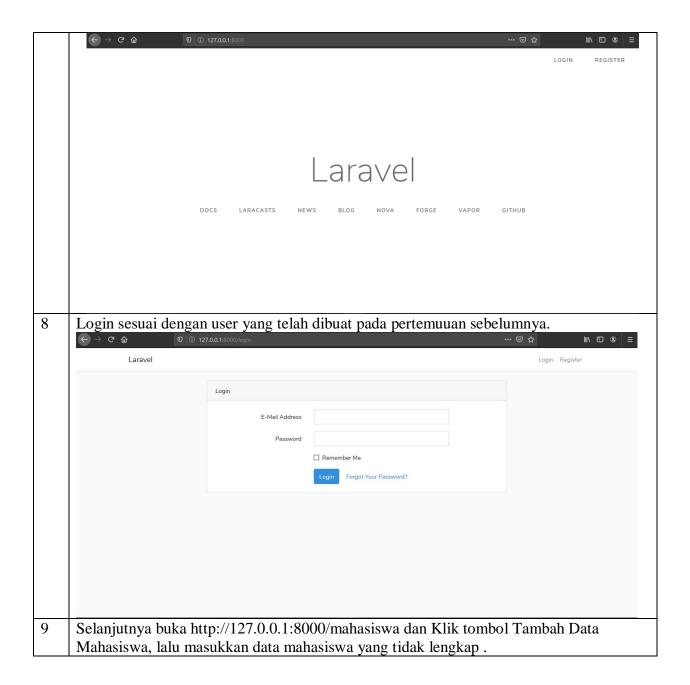

ALAN PERDHANA TIMOR / NIM : 1841720187 KELAS TI 2A

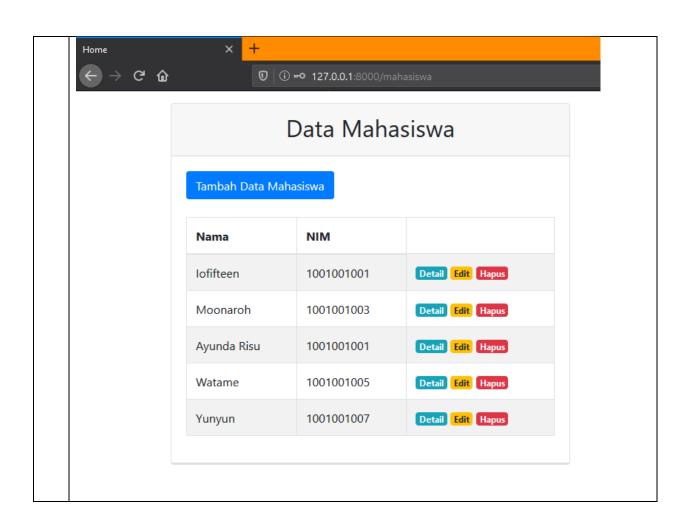

## PROGRAM STUDI TEKNIK INFORMATIKA JURUSAN TEKNOLOGI INFORMASI POLITEKNIK NEGERI MALANG 2020

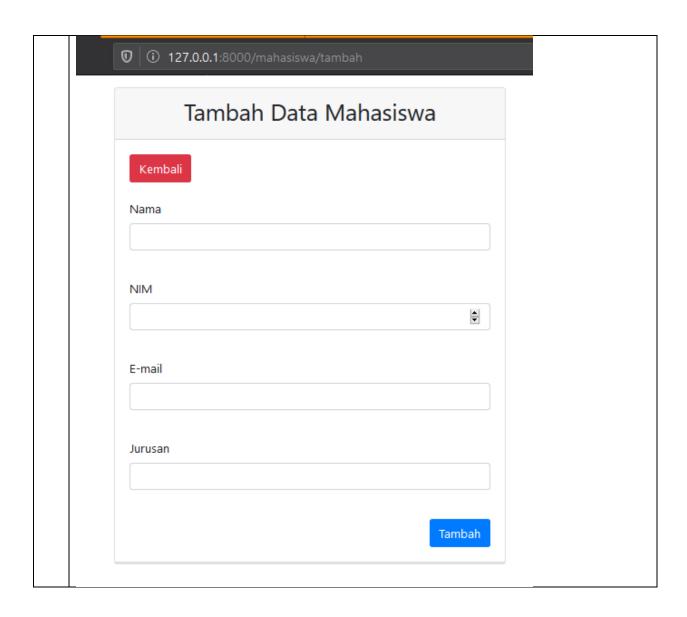

```
Buka project Laravel "laravel-crud"
     Buka file laravel-crud/routes/web.php. buatlah 2 route, yaitu route get. dengan url
     'mahasiswa/tambah' yang akan mengakses method tambah pada controller
     MahasiswaController, dan route yang 1 nya lagi kita buat route post, dengan url 'simpan'
     yang akan memproses method atau function simpan pada controller
     MahasiswaController
      Route::get('/mahasiswa/tambah','MahasiswaController@tambah');
       Route::post('/mahasiswa/simpan','MahasiswaController@simpan');
3
    Buat 2 buah method pada laravelcrud/app/Http/controller/MahasiswaController.php.
                    public function simpan(Request $request)
                        $this->validate($request,[
                             'nama' => 'required',
                             'nim' => 'required|numeric',
                             'email' => 'required|email',
                             'jurusan' => 'required'
                        ]);
                        //insert data ke table mahasiswa
                        DB::table('mahasiswa')->insert([
                             'nama' ⇒> $request->nama,
                             'nim' => $request->nim,
                             'email' => $request->email,
                             'jurusan' => $request->jurusan
                        ]);
                        return view('simpan',['data' => $request]);
     Buat view tambah di
    laravel-crud/resources/views/tambah.blade.php
    @extends('master')
    @section('title','Tambah Data')
    @section('judul_halaman','Tambah Data Mahasiswa')
    @section('konten')
         <a href="/" class="btn btn-danger">Kembali</a>
         <br/>
         <br/>
```

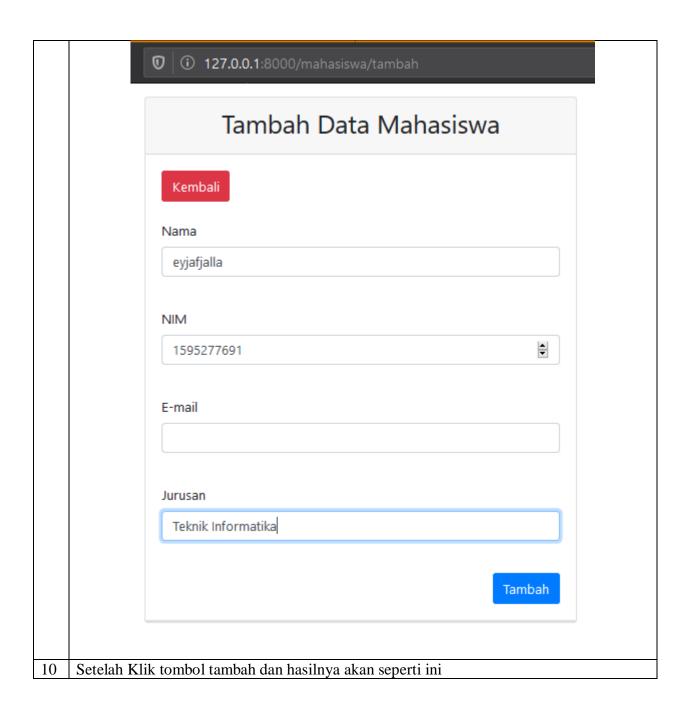

```
<!-- Menampilkan error validasi -->
    @if (count($errors) > 0)
    <div class= "alert alert-danger">
        <l
            @foreach ($errors->all() as $error)
                {{ $error }}
            @endforeach
        </div>
    @endif
    <form action="/mahasiswa/simpan" method="post">
        {{ csrf field() }}
        <div class="form-group">
            <label for="namamhs">Nama</label>
            <input type="text" name="namamhs" class="form-</pre>
control" required="required"> <br/>>
        </div>
        <div class="form-group">
            <label for="nimmhs">NIM</label>
            <input type="number" name="nimmhs" class="form-</pre>
control" required="required"> <br/>>
        </div>
        <div class="form-group">
            <label for="emailmhs">E-mail</label>
            <input type="email" name="emailmhs" class="form-</pre>
control" required="required"> <br/>>
        </div>
        <div class="form-group">
            <label for="jurusanmhs">Jurusan</label>
            <input type="text" name="jurusanmhs" class="form-</pre>
control" required="required"> <br/>>
        </div>
        <button type="submit" name="tambah" class="btn btn-primary float-</pre>
right">Tambah Data</button>
    </form>
@endsection
Selanjutnya buat view simpan di
laravel-crud/resources/views/simpan.blade.php
@extends('master')
@section('title','Validasi Data')
@section('judul_halaman','Validasi Data Mahasiswa')
```

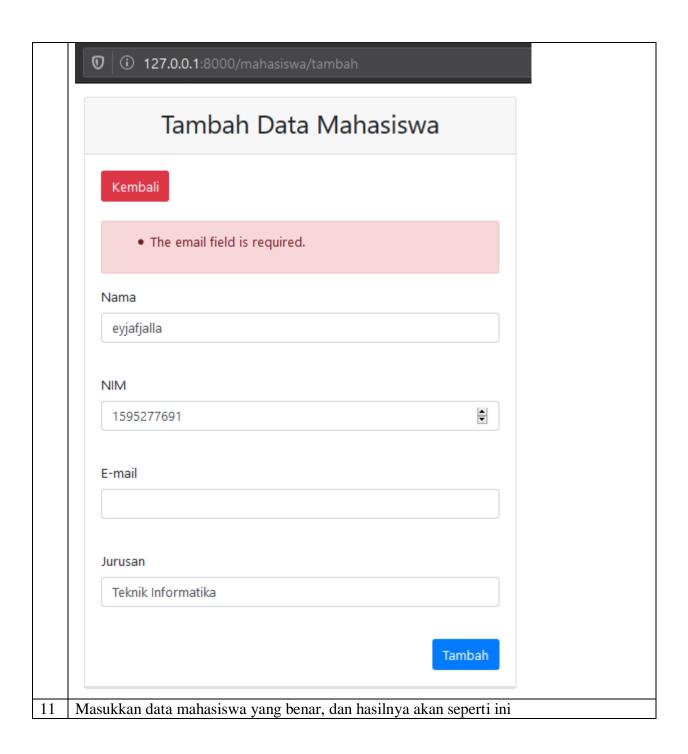

```
@section('konten')
   <h3 class="my-4">Data Yang Di Input</h3>
   Nama
        {{ $data->nama }}
      NIM
        {{ $data->nim }}
     Email
        {{ $data->email }}
     Jurusan
        {{ $data->jurusan }}
     <a href="/mahasiswa" class="btn btn-primary">Kembali</a>
   @endsection
   Jalankan Project Laravel Kita
6
    PS C:\xampp\htdocs\laravel-crud> php artisan serve
    Laravel development server started: http://127.0.0.1:8000
7
   Akses http://127.0.0.1:8000/
```

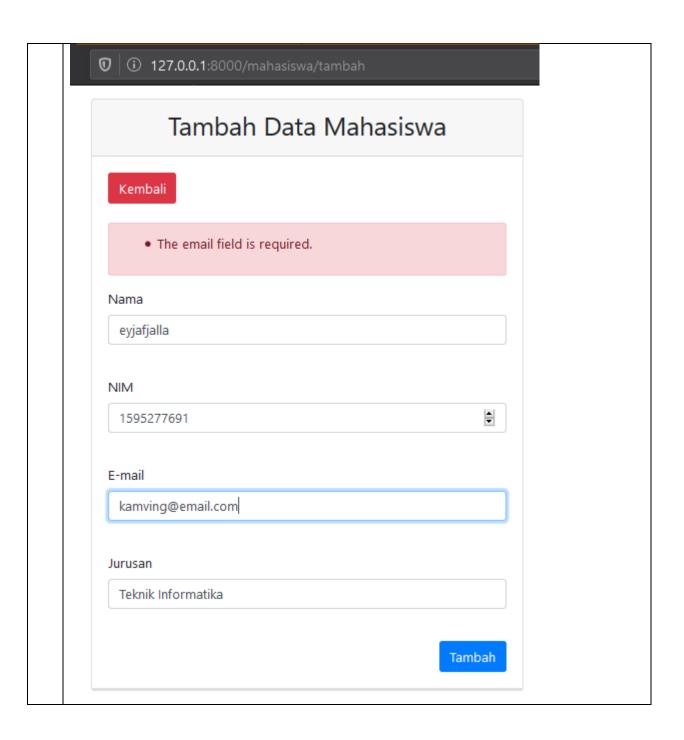

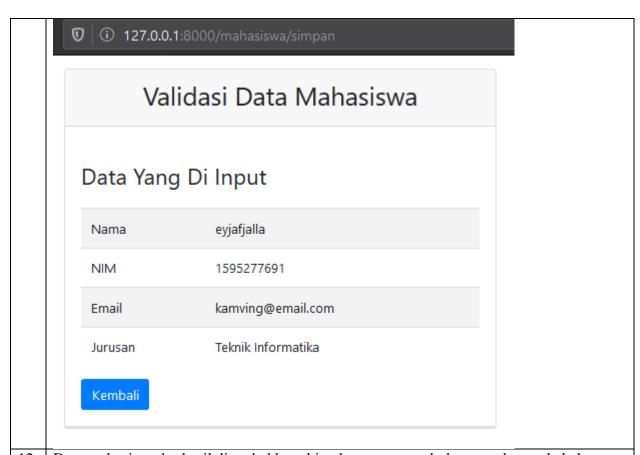

Data mahasiswa berhasil ditambahkan, kita dapat mengecek data tersebut pada halaman http://127.0.0.1:8000/mahasiswa
